This office action is a first action on the merits of this application. Claims 1-135 are presented for further examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-35, 48-82, 95-124, drawn to a method and system for *storing* data in a distributed computing environment, classified in class 709, subclass 219.

II. Claims 36-47, 83-94, 125-135, drawn to a method and system for *retrieving* data in a distributed computing environment, classified in class 709, subclass 214.

The inventions are distinct, each from the other because of the following reason:

Invention Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are show to be separately usable. In the instant case, invention I has separate utility such as storing data, while invention II has separate utility such as retrieving data. See MPEP § 806.05(c).

Because these inventions are distinct for the reason given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Larry E. Henneman. Jr. on 1/31/2005, Mr. Henneman requested to have the election/restriction requirement mailed prior to making an election.

Art Unit: 2153

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is also reminded that to traverse this requirement on the grounds that the groups are not patentably distinct, applicant should present evidence or identify such evidence now of record showing the groups to be obvious variations of one another. If the groups are determined not to be patentably distinct and they remain in this application, any rejection of one group over prior art will apply equally to all other embodiments. See Ex parte Appeal No. 315-40, 152 USPQ 71 (Bd. App. 1965). No argument asserting patentability based on the differences between the groups will be considered once the groups have been determined to comprise a single inventive concept.

Conclusion

1. This office action is made NON-FINAL.
